

DH Series – Hydraulic Die Handler
2000 to 4000 lb capacities

The DH series hydraulic die handler is a cost effective mobile die cart that allows you to transport, separate, and present your dies for service and maintenance.

This die handler includes a die handling attachment assembly attached to one of our standard mobile lift tables. A wide range of standard sizes and options are available to suit the customer’s specific material handling requirements.

Its rugged construction consists of a heavy-duty welded steel frame. The table top is guided by exceptionally rigid telescoping guide tubes. These die handlers are designed to last for decades with very little maintenance in the most demanding environments.

These die handlers are engineered with ergonomics and productivity in mind. The high capacity hydraulic system allows the operator to quickly and safely raise the die. Manual foot operated and AC or DC electric hydraulic options are available. The hanger/clamp assembly’s position is adjustable along the length of the boom. Clamps are machined from 3.5” x 3.5” x 4.5” steel blocks and use a large set screw to securely attach to the upper die half.

These tables can be equipped with a tow bar to provide mobility when coupled to tow capable equipment such as a forklift. High capacity, large diameter steel (standard) or poly-steel (optional) casters provide low rolling resistance over most surfaces. The position of the table can be anchored through its telescoping floor locks.

Many options are available to improve ergonomics and productivity. Easier on/off load transfer through conveyor or ball transfer roller tops and manual or electric hydraulic push pull mechanisms.

Standard sizes and capacities range from 30” x 30” to 30” x 60” tops and 2000 to 4000 lbs. Custom sizes and capacities are possible for your specific needs. Lexco Engineering and Manufacturing has over 50 years of experience and knowledge, which translates into a valuable resource in the material handling industry.

Model DH-3438-24 with optional rigid die hangers and indexing mechanism.

Model No.	Capacity	Top Size	Maximum Die Size	Top Lift Range			Minimum Clearance of Bar to Table Top	Casters		Floor Locks	Shipping Weight
				Low	High	Lift		Swivel	Rigid		
DH-3339-22	2000	30 x 30	30 x 24	30	48	18	19-7/8	2	2	1	388
